Experience

Wipro Hyderabad, Telangana

Software Engineer *Mar 2025 - Present*

- Spearheaded the migration of legacy Java systems to **Spring Boot microservices**, optimizing REST APIs and database queries to **improve response time by 50%** and **reduce server costs.**
- Enhanced distributed system reliability by **implementing CI/CD pipelines (Jenkins, Docker)** and **automated testing strategies (JUnit, Mockito)**, reducing **production downtime by 30%** and achieving zero-rollback releases.
- Improved backend security and **reduced technical debt by 30%** through **Spring Security enhancements**, **SonarQube integration**, and **SQL query optimization (40% faster execution).**
- Optimized Java-based backend applications in an Agile environment, debugging critical system issues and establishing Git/GitHub branching strategies that **reduced code integration conflicts by 60%**.

Blue Planet Infosolutions Pvt. Ltd. Remote

Software Developer Intern *May 2022 - Nov 2022*

- Developed and launched **3 serverless backend skills** using Python and AWS Lambda, managing data processing and backend logic for the Pan Health Team.
- Implemented voice recognition software and **integrated backend REST APIs** to manage medicine reminder scheduling and persistent data storage.
- Drove a **3.6-point** increase in user engagement by optimizing backend API response times and ensuring high availability of the medicine reminder services.

Education

Haldia Institute of Technology Haldia, West Bengal

Bachelor of Technology, Computer Science & Engineering *Dec 2020 - May 2024*

- **Courses**: Data Structures • Algorithms • DBMS • Java • Object Oriented Programming • Computer Networks • Operating System
- **CGPA**: 8.69/10

Skills and Others

Languages: Java • SQL • JavaScript
Backend & Frameworks: Spring Boot • Spring Core (IoC, DI, Beans) • Spring MVC • Spring Data • Spring AOP • Spring Security (JWT, OAuth2) • Hibernate • REST APIs • Microservices • Kafka
GenAI & LLM Stack: Spring AI • LangChain4j • OpenAI API • AWS Bedrock • RAG • Prompt Engineering • Vector DBs (pgvector) • Embeddings • LLM Evaluation • Guardrails
Databases & Caching: PostgreSQL • MongoDB • Redis
DevOps & Observability: Docker • Kubernetes • Jenkins • GitHub Actions • AWS (EC2, S3) • Prometheus • Grafana • CI/CD
Testing & Code Quality: JUnit 5 • Mockito • Testcontainers • SonarQube

Projects

SOCIALISER | *Code*

- Engineered an innovative website tailored for SMMA agencies, leveraging the latest technologies to enhance user experience, resulting in a **30% increase** in client retention rates and **a 20% boost** in overall site traffic
- Coordinated comprehensive architecture reviews with Next.js, React.js, CSS, Auth.js, and Bcrypt.js, resulting in a **35% improvement in password encryption strength** and helps for users authorization process

ALIGNECT | *Code*

- Developed a cutting-edge project management platform to streamline project tracking and boost efficiency, utilizing the power of the latest technologies, ultimately driving increased site traffic
- Integrated the comprehensive architecture with Next.js, React.js, Hono.js, Tailwind CSS and Appwrite to optimize performance. This strategic approach resulted in a significant **36% reduction in website load time**
